

Position for a Junior Researcher in Modeling of Mechanochemistry Processes

Location	Salary	Deadline for applications
Lisbon, Portugal (presential, hybrid or fully remotely)	1700 EUR gross monthly salary plus food allowance	15 of August 2024

Position summary

DES Solutio, a start-up company is hiring chemical engineers (or similar) with experience in modelling in Aspen Tech or Chemcad, preferably with experience in mechanochemistry or solid phase processing. The work can be carried out remotely, presently or in hybrid mode, depending on the candidate preferences.

Context

The position is within the work package 5 of the European project IMPACTIVE. For more information please visit: <https://mechanochemistry.eu/>

Main tasks

The candidate will model processes developed experimentally by other partners which will perform the scale-up and provide the necessary data for the modeling of the process at industrial scale using modeling software such as Aspen Tach or ChemCad.

Qualifications and candidate profile

The candidate must have a master's in chemical engineering or similar

Remuneration

The candidate will receive a monthly gross remuneration of 1 700 EUR plus food allowance.

Starting date

1 of September 2024
